ALWAYS ON HAND.

Friday Morning, Jan. 14, 1870. Immigration. The word Immigration has been so often placed at the head of our columns that we might hesitate to repeat it, save that the greatest of all our wants is population; for that also implies capital and development. It may well be taken for granted that British Co. emigration. In climate, in natural resources, and in the comparative case with which a condition of independent wellbeing may be attained, this colony will undoubtedly compare favorably with the most favored in the world.
How shall we obtain population? This is, indeed, the crux of the whole matter. This is the question to which it becomes the first, the highest duty of the Government and the Legislature to furnish a practical answer. Without population what is the use of legislation? For the matter of that, what is the use of the Government? We have bound-less sweeps of rolling prairie and fertile valley; but there are none to till these waiting acres. Our forests swarm with game and our waters teem with fish; but there are none to catch, and none to consume. Nature's ample storehouses everywhere overflow with gold, and silver, and copper, and lead, and iron, and coal; but there are none found to and coal; but there are noted found throw open the doors and take of these rich and practically inexhaustible treasures. How shall we obtain population? The chief difficulty appears to consist in our remoteness from the great centres of population: Yet, in this fast age of ours, when both time and space are tries residulated by science and enterbeing annihilated by science and enter-prise, surely this difficulty, formidable as it unquestionably is, can and will be overcome. Were the Canadian Paoific Railway completed and the huge wave of British emigration breaking upon the foothills of the Rocky Mountains, the answer to our question would, indeed, be simple. But these are results yet in the future—not in the distant future, yet too remote to justify our waiting. We must have population; and we must have it now. Where and how are we to obtain population? Look at England—'Merrie Old England,' with her millions crowding and trampling each other down—rotting in festering heaps! 'Why is this thus?' Because the nation has not done her duty either to answer to our question would, indeed, why is this thus? Because the nation has not done her duty either to herself or to her colonies. We do not, perhaps, want paupers; but we want population. Buter seek to draw it from those classes from which the ranks of pauperism are requited. of pauperism are recruited. Let us enter the rural districts, and what do we flud? Men, able-bodied, hearty, houest Englishmen with families to provide working fourteen hours a day for eleven shillings a week, of which sum only nine shillings are paid in cash the remainder being taken out in wash or offair. But we will let the wash or toffal?, But we will let the honest wife tell the tale, as she told it to the Commissioners:—'My husband has 8s a week and has a cottage and garden. We mayn't keep a pig; but, instead of this, master gives us 6d a week for the wash. Some of them will be their man hore wife and thus them let their men have a pig, and trust them until it gets fat, and then take half of i. to pay for the food to fatten it. Near Bridport, we'd have the gristing of the farmer, and he'd keep it back out of our wages; he'd charge us the market price for it. Here we pay £1 a sack for flour. We have it ground for 2s; sometimes they let the miller take some of it for grinding; they will take 7 lb out of a bushel; we do not think always that we get the flour back of the corn we sent. We bake our own bread. Sometimes, if anything happens, master's glad to sell us some of the meat. In the last three years we have got perhaps seven or eight bits in this way. We have bought a bit at Christmas, when the children are here. We buy a little pig meat; we use it with the potatoes; we don't have a dish of pig by itself. At harm vest we ent some cheese, but not at any other time. We don't of en get pota-When we'd ten at home we couldn't live on the bread we could bay.
We could make a meal a day off rice. We'd buy a few peas; my husband could never cat barley. My children nsed not to drink much tea. I'd mix them a little broth (bread, hot water, pepper, and salt). At harvest and haytime we get money to buy cider.' This, be it remembered, is not a picture of pauper life; but of the self-sustaining, industrious, and, we might almost add, contented rarm labourer. Just imagine that woman's husband in British Columbia, with his eght shillings in hard cash for every day of ten hours, and the children keeping the table constant, Or, think of him upon his own free homestead, surrounded by peace and plenty. Has Britain done her duty in this matter of distributing population? Are we doing our duty? How can a few of these hardy honest, willinghearted and horny-handed Englishmen and their wives be transferred from the overcrowded soil of the Old Country to the fertile and inviting acres of this magnificent country? As was stated in a previous article, the English mind is

would become chargeable on the parish union if they wanted relief, thus reaching the very class to which we have been alluding and aiming at prevention, as well as cure. True, £10 would fall far short of bringing the man here, to say nothing of his wife and possible children. But, then, we must be prepared to do something ourselves. If able hedged in the control of that we might hesitate to repeat it, save selves. If able-bodied immigrants in obedience to the stern command of are worth a thousand dollars a head felt duty. It will readily be admitted to the United States, are they that the greatest of all our wants worth less to British Columbia? Suppose we get them at £20 apiece or £40 apiece, if need be, would not the investment be specially good? But as the conveyance out is the great lumbia presents a desirable field for difficulty, why might not Her Britannic majoration. In climate, in natural Majesty's fleet be made useful? Surely a few of these ships might well be employed in the glorious work of distributing the Queen's subjects over her vast territory, with a view to promoting, in the highest and most practical sense individual wellbeing and national strength. The navy would strengthen the nation far more effectually in this way then by blowing people's brains out. If, instead of idly cruising on the high seas, merely to kill time, a few of these ships were employed in conveying the surplus population of the Old Country into the Colonies—transforming an element of weakness and disgrace at home into one of strength and glory abroad, they would accomplish a greater and more permanent good for the nation than they are likely to attain with powder and shot, and they would most effectually lighten that taxation in which their mainten-ance forms no small item. Then, indeed, would that scripture be fulfilled which describes the nations as turning their swords into plough-shares and their spears into pruning-hooks, and study-ing the art of war no more. The subject of obtaining population, and obtaining it immediatly, must receive earnest attention. Various emigration organizations at home are anxiously awaiting the co-operation of the Colonies. Let us do what we can, and appeal to the nation to do the rest, either with its idle treasure or with its idle ships.

> THE AUSTRALIAN RABBITS -- Owners of runs continue to expend large sums of money in order to prevent the increase of the wild rabbits, which, in some districts, appear to rabbits, which, in some districts, appear to have become a formidable nuisance. Mr. Robertson's run at Colac, for instance, is enclosed with stone walling, and a man win a pack of hounds is engaged in keeping 'the rabbits outside the boundary, while the run has been already cleared by the work of the rabbitery, at an expenditure up to the present date of £9,000. Dr. Stoddart has four miles of walling completed, and has granded of walling completed, and has expended £1,300 in endeavouring to get rid of the bunnies. Mr. H. Murray has also expended some thousands of pounds in a like manner.

GUBERNATORIAL HOSPITALITIES .- The following is from the Toronto Daily Telegraph : The is no denying that the salaries of all requirements of the office—It was the social time that the Governor's brother, Col Bruce, who acted—and acted most judiciously—as his secretary for a number of years, should charge himself with the daily of finding out what representative men—whether Caus-dians from outside districts, or sejournerfrom the mother-country, or stranges from other countries—were in town. To all such it was Lord Elvin's desire that the bo pital ities of Government House should be extend-To those who remember the kindly unaffected, genial manner of both Col Bruce and Lord Eigin, it is unnecessary to say how well the duty of discovering, inviting and entertaining such guests was performed. We think it of great importance to the country that our Governors should now, and for all future time, follow so worthy an example; we say this without the remotest desire refer is neglected. We touch on the subject rather to indicate that if the Governor of the province of Onlario is to do the part of an hospitable entertainer the new Government House will not be found to be at all too extravagant either in style or dimensions, while at the same time it will be admitted while at the same time it will be admitted that the present salary attaching to the office of Lieut. Governor must, unless the incumbent is independently wealtny, set a narrower limit to his hospitality than is at all desirable. The question is one which the Government and the House may properly give their attention to one of these days.'

THE WATERLOGGED BARK MARIA J SMITH THE CAPTAIN AND CREW SAVED-THE VESSEL AGAIN A DERELICT. - Yesterday atternoon the steamer Politolisky, Capt Guin-don, came in from Port Madicov, Puget don, came in from Pott Madrico, Paget Sound, having on board several possengers, among whom were Mr G A Meiggs and Capt Smith of the Maria J Smith, intely abundance in a waterlogged state off Barclay Sound, and subsequently picked up, towed to the mouth of the Straits and cast off during a severe gale, about two weeks since. Capt Smith reports that after being cast off he the Strairs, but that owing to the water-logged state of the bark he was unable to do so. The weather up to Saturday last was fine and winds light. On Saturday morning a terrific gale sprang up which lasted until morning when it lulled and the bark Sampson bound up the Sound from San Francisco, hove in sight. Captain Smith st his flag union down and was taken aboard the Sampson. At noon an observation was had, as ascertained that the position of the and it was ascertained that the position of the bark was ten miles south of Cape Flattery, and about 15 miles off shore; an attempt was then made to rejoin the M. J. Smith which failed, and the Captain of the Sampson, fearful lest a strong correct which was setting in shoreward would carry him on the rocks, declined an offer of \$1,500 to follow oup the bark and again place her master and crew on board. The Sampson stood away for Port. Townsend on Tuesday, n.et the Politofisky in the straits resterday after-noon, and put Captain Smith aboard of ter. Capt. Smith is of opinion that the back is still affoat and may be saved by a powerful She is certainly a remarkable ship.

tation angut the Pound its character and result to that which brought the Municipal body into so much contempt when the Church Reserve question shook the city to its centre and which ended in the plete discomfiture of the Municipality, complete discominate of the state of the condition of the was alleged, improperly paid for the pound-age of seven horses belonging to him. This resolution the Mayor declined to put to the Council, because, as he asserts, the Council has no power to refund the money without proof regularly established, that the imposi-tion of the penalty was nnjust. Fur of the Councillors—all and Pound law men—pinned the Mayor in his chair until 'ayant the witching hour o' twal',' yesterday morning, his Worship refusing to put the motion and the Councillors refusing to adjuarn, when one of the majority in obedience to a pressing call, withdrew for a moment and left the meeting without a quorum, when the Mayor arose and went home. The Council will meet again to-day, when the interesting discussion will probably be resumed. cussion will probably be resumed.

THEATRE ROYAL .- The crowd which attended the Theatre Royal last evening, conveyed by its presence a merited compli-ment to Mr Pauncelort, for whose benefit the performance was given. The play was 'Money,' and was highly successful. At the close of the entertainment Mr Pauncefort and Carrie Carter were called out and loudly

applauded. THE Enterprise got off for New West-

minster at 7 o'clock yesterday morning.

LEGAL LICENSES .- Mr Robert Bishop appeared before the Police Magistrate in response to a summons charging him with the sponse to a summons charging him with the nonpayment of the solicitor's yearly licente of \$50. Mr Bishop explained that he had tendered the sum of \$25 to Mr Theakstone, the Magistrate's clerk, in response to a note from that officer demanding payment of that amount, but that Theakstone declined to receive it, saying the amount was \$50. Hc—Mr Bishop—then tendered the \$50 to Mr Theakstone, who said that, being engaged in another matter, he could not attend to him. 'Then,' said Mr Bishop,' I went away, and two hours afterwards I was summoned.' Mr Bishop here tendered the amount of the license, but said he thought he should not be adjudged liable to pay the cost of the summons. The Magistrate thought otherwise and the costs were also thought otherwise and the costs were also

CANADIAN SALT BED!-The Huron Signal published in Goderich, says the area of Huron and Bruce embraces at least 600 square miles and abds that if it could be shown that the salt stratum is 40 feet thick ti would be of great importance to have the data established. It is assured by Mr. Platt, who bored the first well in either haron or Bruce, that the stratum of solid salt pierced here is 40 feet thick, but there are one or two thin layers of sedimentary de posit interlaid. Thus it is to all intents and posit interlate. Thus it is to all intents and purposes a solid mass of salt, the strata interlaid never having effected in the least the strength, quality or volume of the brine produced. Canada may justly claim the grandest deposit of pure salt in the world.

MAIL. The steamship Gussie Tellair, Capt. Rogers, arrived at 41 o'clock yesterday afternoon from Portland via Puget Sounds bringing Mr. Berrin Barnett and a few passenger, and 100 tons of freight. The Tel-fair brings no mail, as she did not connect at Astoria with the San Francisco steamer; the mail that came up on the previous steamer was sent overland and arrived here on Monday night by the Olympia. At Seattle the Tellair left 120 tons of freight. We are indebted to Mr. Goodhue for the usual favors.

MORE TROOPS FOR IRELAND. - Recent exchanges mention that five thousand additional troops of the line were immediateby to be dispatched to Ireland, raising the force of the regular army there to about 30,000 men. It is also stated that on the assembling of Parliament, a bill will be introduced o empower the Government to suspend the habeas corpus act in Ireland by executive

ERRATUM-In the published proceedings of the City Council, in yesterday's issue, we made the Auditor's Report say that 'the statement of receipts and expenditures for 1869 would be found correct, whereas it should have read, the statement of receipts and expenditures for 1869 was not quite

FROM NANAIMO. - The steamer Sir James Douglas arrived from Nanaimo last evening bringing Messrs James, Dawes, Young and several other passengers. The Douglas towed the bark Atlanta, laden with coal, out of Nanaimo harbor vesterday. The quarrymen are at work on Newcastle Island.

THE Guss'e Telfair will sail for Napaimo to day, tak in a cargo of coal, and return to this port and await the arrival of the Cali-fornia before proceeding to San Francisco.

COUNTY COURT .- Rowland P Dobrin .- In this suit for damages, Mr Pemberton yesterday decided that defendant should pay \$31 50 and costs.

THE Steamer Pollitoffsky will take aboard for Port Madison a quantity of the wrecked ship Cowper's gear, which has been sold to Mr. G. A. Meiggs.

Stewart moved to take up a bill entiling Virginia to representation in Congress. Summer opposed action on the bill until a committee investigates the condition of affairs in Virginia. The bil was taken up and an animated discussion ensued. Stewart urged prompt admission of the State on the ground that the faith of Congress was pledged thereto. Summer urged as a reason or deferring action the condition of things in Tennessee which should teach the Senate caution. If the bill was allowed to go over until next week, he would not oppose its consideration. Howard opposed the admission of Virginia and said he could not overlook the fact that the legislation was ever whelmingly rebellions. Edmonds wanted the bill postponed till he could inv sligate the condition of affairs in Virginia. Morton took the ground that the spirit of the entire reconstruction are gives all rebels the right to take part in the re-organization of the State except such as are embraced in the third clause of the 14th amendment of the State. Drake moved as amendment providing that any luture reconstruction by a state of its ratification of the 15th amendment should operate to exclude it from representation. The debate continued without reaching a vote, In the House a large number of bills were introduced, a large portion of which was a bill appointing repersentatives to Congress by Paine. Prominently among the events that have transpired in Shanghai stands recorded the reception given to the son of Queen Victoria As Captain of H M S Galatea, the Duke of Edinburg received and accepted the profier-ed welcome of all the foreigners resident in Shanghui. The flags of all nations were on this cceasion blended together, and the community en masse signified their appre-ciation of this visit by taking a spoutaneous holiday and allowing themselves three days' grace from business cares. The British subjects and the cosmopolitans of the place addressed the Duke in terms of carnest respect, and these written greetings, with the appropriate responses, were carried out with all the customary formulas. The hospitalities of Shanghai were then accepted with apparently a hearty, sailor-like good-will, and on the several occasions when the Duke was prominently before the assemblages of

the people, either at the theatre or at the bauquet table, the general enthusissu pro-duced was unmistakably sincere. Ayer's Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.
Thin hair is thick-

ened, falling hair checked, and baldpess often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy lustre and a grateful perfume.
